DETAILED ACTION

1. The Applicants' amendment filed on April 13, 2006 is acknowledged. Claims 4 and 24 are deleted. Claims 1-2, 5-7, 9-12, 14, 18-22, 25-27, 29-32 and 34-37 are amended. Now, Claims 1-3, 5-23 and 25-42 are pending.
2. Claim rejection(s) (except Claims 6 and 25) under 35 USC 112 in the previous Office Action (Paper No. 12292005) is/are removed.
3. The text of those sections of Title 35, U.S. code not included in this action can be found in prior Office Action(s).

Claim Rejections - 35 USC § 112

3. Rejection of Claims 6 and 25 under 35 USC 112, second paragraph, is maintained because the rejection is adequately set forth in paragraph 5 of Paper No. 12292005. It appears that Applicants have not clarified this issue yet.

Claim Rejections - 35 USC § 102

5. Rejection of Claims 1-3; 5-6, 8, 10-12, 21-23, 25-26, 28, 30-32 and 38 under 35 USC 102(b) as being anticipated by Saito (US 4 259 225) is maintained because the rejection is adequately set forth in paragraph 7 of Paper No. 12292005.

Applicant's arguments have been fully considered but they are not persuasive. The focus argument related to the core patentability is discussed below.

For Applicants' argument (Remarks, page 12, 1st paragraph), note that the terms "for reducing sag in a wellbore servicing" and "wellbore servicing" in Claims 1 and 21 are merely intended uses, and do not carry any weights of patentability. As such, Claim 1 is directed to a method of combining a cystosol ester compound with a non-aqueous fluid and particles. Claim 21 is drawn to a fluid composition.

Claim Rejections - 35 USC § 103

6. Rejection of Claims 1-3, 5-8, 10-12, 21-23, 25-28, 30-32 and 38 under 35 USC 103(a) as being unpatentable over Saito (US 4 259 225) is maintained because the rejection is adequately set forth in paragraph 9 of Paper No. 12292005. Applicant's arguments have been fully considered but they are not persuasive. The focus argument related to the core patentability is discussed below.

For Applicants' argument (Remarks, page 12, 1st paragraph), note that the terms "for reducing sag in a wellbore servicing" and "wellbore servicing" in Claims 1 and 21 are merely intended uses, and do not carry any weights of patentability. As such, Claim 1 is directed to a method of combining a cystosol ester compound with a non-aqueous fluid and particles. Claim 21 is drawn to a fluid composition.

7. Rejection of Claims 1-3, 5-6, 8, 13, 21-23, 25-26, 28, 33 and 38 under 35 USC 103(a) as being unpatentable over Bock (US 4 458 757), optionally in view of Saito, Rothrock (US 2 437 046) and/or Smutny (US 3 112 338) is maintained because the rejection is adequately set forth in paragraph 10 of Paper No. 12292005. Applicant's arguments have been fully considered but they are not persuasive. The focus argument related to the core patentability is discussed below.

For Applicants' argument (Remarks, page 13, last paragraph bridging to page 14, 1st paragraph), note that the terms "for reducing sag in a wellbore servicing" and "wellbore servicing" in Claims 1 and 21 are merely intended uses, and do not carry any weights of patentability. As such, Claim 1 is directed to a

method of combining a cystosol ester compound with a non-aqueous fluid and particles. Claim 21 is drawn to a fluid composition.

8. Rejection of Claims 1-6, 10-13, 21-26, 30-33 and 38 under 35 USC 103(a) as being unpatentable over McCabe (US 2005/0087341), optionally in view of Saito, Rothrock (US 2 437 046) and/or Smutny (US 3 112 338) is maintained because the rejection is adequately set forth in paragraph 11 of Paper No. 12292005. Applicant's arguments have been fully considered but they are not persuasive. The focus argument related to the core patentability is discussed below.

For Applicants' argument (Remarks, page 14, last paragraph bridging to page 15, 1st paragraph), note that the terms "for reducing sag in a wellbore servicing" and "wellbore servicing" in Claims 1 and 21 are merely intended uses, and do not carry any weights of patentability. As such, Claim 1 is directed to a method of combining a cystosol ester compound with a non-aqueous fluid and particles. Claim 21 is drawn to a fluid composition.

9. Claims 9, 14-20, 29, 34-37 and 39-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the above references, taken alone or in combination, teaches or fairly suggests the use of the specific particles set forth in the instant claims.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
